Manning & Napier Fund, Inc.

High Yield Bond Series

September 30, 2025

Overall Morningstar Ranking (Class I)

MNHAX received a 5-Star Overall Rating out of 586 High Yield Bond funds, based on risk adjusted returns derived from a weighted average of the Fund's 3-,5- and 10-year Morningstar metrics.

See next page for additional details

Investment Objective

To provide a high level of long-term total return by investing principally in non-investment grade fixed income securities that are issued by corporate and government entities.

Investment Strategy

A bottom-up approach is used to uncover securities with stable and/or improving fundamentals and, just as importantly, prevent purchasing or holding onto securities whose fundamentals are deteriorating (including risk of default).

- Typically 50 100 holdings
- Position size of ~1.5% to 2%
- No maturity or duration limits; expected duration: 3 to 6 years
- 0% 20% investment-grade securities
- 80% 100% high yield securities
- U.S. dollar-denominated securities only

Fund Information

	Ticker	Cusip	Inception	Minimum Investment	Gross Expenses	Net Expenses
Class Z	MHYZX	56382R241	03/01/2019	\$1,000,000	0.48%	0.48%
Class I	MNHAX	56382P195	08/01/2012	\$1,000,000	0.59%	0.59%
Class S	MNHYX	56382P583	09/14/2009	\$2,000	0.91%	0.91%

Minimum investment may be waived for Class Z and I in certain qualified retirement plans and discretionary investment accounts of the Advisor.

Minimum Investment may be waived for Class S in certain qualified retirement plans, participants in an automatic investment program, and discretionary investment accounts of the Advisor.

Net expenses for Class Z and I reflect the Advisor's contractual agreement to limit its fees and reimburse certain expenses. The contractual waiver may not be amended or terminated without the prior approval of the Fund's Board of Directors. Class Z shares do not make payments to financial intermediaries.

Net expenses for Class S includes a 12b-1 fee of 0.25%, of which up to 0.25% is available as a shareholder servicing fee.

Annualized Performance

	QTR	YTD	1Y	3Y	5Y	10Y	Inception (09/14/2009)

ICE BofA HY Cash Pay	2.39%	7.06%	7.18%	10.91%	5.49%	6.05%	6.72%

Performance data quoted represents past performance and does not guarantee future results. Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863.

Class Z and Class I since inception performance is based on the High Yield Bond Series Class S inception of 09/14/2009. For periods through 03/01/2019 (the inception date of the Class Z shares) and 08/01/2012 (the inception date of the Class I shares), performance for the Class Z and Class I shares is based on the historical performance of the Class S shares. Because the Class Z and Class I shares invest in the same portfolio of securities as the Class S shares, performance will be different only to the extent that the Class S shares have a higher expense ratio.

30-Day SEC Yield (as of 09/30/2025) Yield Class I 6.87%

Series

If fees had not been waived, the 30-day SEC Yield (as of 09/30/2025) would have been 6.87% for Class I.

What You Should Know About Investing

All investments involve risks, including possible loss of principal. There is an inverse relationship between bond prices and interest rates; as interest rates rise, bond prices (and therefore the value of bond funds) fall. Likewise, as interest rates fall, bond prices and the value of bond funds rise. Investments in higher-yielding, lower-rated securities involve additional risks, including a higher risk of default and loss of principal. Investments in derivatives can be highly volatile and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. Also, the use of leverage increases exposure to the market and may magnify potential losses.

Fund Commentary

The U.S. economy remained resilient this quarter, as strong consumer spending and an AI-driven capex boom offset labor market softness, tariff impact uncertainty, and sticky inflation. Job growth slowed sharply, with hiring plans at multi-year lows, prompting the Federal Reserve to cut rates in September and signal further easing ahead.

During the quarter, Treasury yields declined across the curve while credit spreads tightened, resulting in modest gains for bond markets overall. In this environment, longer-duration securities and corporate bonds emerged as the top performers with high yield bonds outperforming investment-grade bonds.

Within high yield, lower quality securities outperformed their higher quality counterparts. From a sector perspective, all sectors were positive with Telecom leading the way, while Transportation generally lagged. Overall, default rates remain low.

The High Yield Series experienced positive absolute returns for the quarter and outperformed on a relative basis. Relative outperformance was driven by individual security selection.

In terms of positioning, we continue to focus on businesses that generate positive free cash flow and that either pay down debt or focus on improving their business with good relative value.

During the quarter, we found a handful of idiosyncratic opportunities, including logistics company Navios South American (which provides ports and barges for the petroleum, agricultural, and mining industry in South America) and litigation finance company Burford Capital (a name we've previously held). Financial Services remains our largest overweight relative to the benchmark and is diversified across industries such litigation finance, student loans, consumer debt receivables, trading platforms, brokerage firms, mortgage originators, etc.

We maintain selective investment-grade exposure in the portfolio, driven by compelling individual opportunities — strong companies trading at attractive valuations relative to both the broader investment-grade and high-yield markets. For example, we hold a position in BGC Group, a brokerage and financial technology firm that we believe is well positioned to benefit from increased market volatility. Sales were generally the result of securities reaching our estimate of "fair value" and finding securities that offer a more attractive risk/reward tradeoff.

Looking ahead, we believe the outlook for interest rates remains uncertain as markets contend with stickier inflation, a weakening labor market, and implications of both domestic and foreign policies. In our view, elevated market volatility is likely to persist for the foreseeable future. Furthermore, valuations within high yield remain elevated and risks are skewed to the downside.

That stated, our approach to high yield allows us to prioritize risk mitigation, while also pursuing select, compelling opportunities. As such, we're confident that our processes arm us with the tools we need to navigate a challenging market environment.

Definitions

Alpha: A measure of an investment's performance relative to a benchmark index. It represents the excess return of an investment compared to the return of the benchmark. **Beta:** A measure of an investment's volatility relative to the overall market.

Standard Deviation: A statistical measure of the dispersion of returns for a given investment. It quantifies the amount of variation or volatility from the average return.

Sharpe Ratio: A measure of risk-adjusted return, calculated by subtracting the risk-free rate from the investment's return and then dividing by its standard deviation.

Duration: A measure of the sensitivity of a fixed income security's price to changes in interest rates. It indicates the expected life of the security and how much its price will change with a 1% change in interest rates. Securities with shorter durations are generally less affected by interest rate changes than those with longer durations.

The "Other" category contains securities such as ETFs and others that cannot otherwise be classified. Portfolio Composition data for the Series (excluding SEC yield) provided by FactSet. Portfolio turnover provided by Morningstar. Industry Breakdown is provided by Bloomberg. Cash allocation may vary slightly given the different sources of data. Investments will change over time. Manning & Napier Fund, Inc. High Yield Bond Series I was rated against Intermediate High Yield Bond funds and had a 4 star rating for the three year, a 5 star rating for the three year, and a 5 star rating overall, as of 09/30/2025, out of 586, 547, 439, and 586 funds respectively. Ratings for other share classes may differ. The Morningstar Ratingrim for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Ratingrim measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Ratingrim for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (fapplicable) Morningstar Ratingrim metrics. The weights are: 100% three-year rating for 36 - 59 months of total returns, 60% five-year rating for 60 - 119 months of total returns, and 50% five-year rating formula seems to g

Credit quality ratings: are measured on a scale that generally ranges from AAA (highest) to D (lowest). Not Rated (NR) is used to classify securities for which a rating is not available. Credit quality ratings reflect the median of Moody's Investors Services and Standard & Poor's ratings. Data obtained from Bloomberg.

The Intercontinental Exchange (ICE) Bank of America (BofA) U.S. Cash Pay High Yield Index (Benchmark) tracks the performance of U.S. dollar denominated below investment grade corporate debt, currently in a coupon paying period, issued in the U.S. domestic market. Qualifying securities must have at least one year remaining term to final maturity as of the rebalancing date, at least 18 months to final maturity at the time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$250 million. The Index returns do not reflect any fees or expenses. Index returns provided by Intercontinental Exchange (ICE).
